### REPORT OF SUPERINTENDENT OF SCHOOLS

To the School Board of Chester:

My fifth annual report deals briefly with enrollment and per pupil costs in elementary schools, reduction in district's liability for high school and academy tuitions, physical welfare activities, and improvement of equipment and grounds.

No changes have occurred in the staff of teachers or in the number and location of schools maintained.

The total enrollment in the Chester schools increased from ninety-nine to one hundred six. However, the average membership showed a gain of only one pupil. The cost per pupil in your elementary schools was \$3.51 less than last year.

This year over twenty pupils from Chester are attending high schools or academies. Here again an economy has been effected by a per pupil reduction of \$11.53 in the district's liability for tuition. This is determined by the average cost of instruction last year in the public high schools of the state. This amount fell from \$89.79 to \$78.26 per pupil. The number of your secondary school pupils now on honor rolls in scholastic and competitive activities and prominent in athletics and debating reflect credit upon the homes and schools of Chester.

Foremost among the aids to physical welfare are the services of your School Nurse, whose activities have received most valuable support from Parent-Teacher and other local associations. I regret that her co-operation in allocating state and federal assistance does not appear in the report of the school nurse.

No single feature of state and federal relief has a greater bearing on the health of growing children than the daily distribution of milk ration. Through the initiative of our Governor federal funds were procured.

and free milk service was inaugurated in March 1933, and is being extended through the present school year. New Hampshire's public and parochial schools are using daily over 15,000 bottles of milk. Such federal activity is no more a form of charity than is the allotment of paper and pencils in our schools. Both are distributed in accordance with the child's physical or educational needs.

Through a complete change of school equipment in a neighboring town the Primary School - accommodating forty children - was equipped with individual desks and chairs similar to those in use in the Grammar School. This improvement was made at less than one fifth the cost of new furniture. Through the same source drinking fountains with bubblers attached were purchased for the two Village schools.

The recent installation of electricity in your school buildings adds much to physical welfare as well as to convenience and efficiency. Particular commendation is due the pupils and teachers, who secured funds for fixtures, and to those who most generously contributed their services in the work of installation.

The gravel grading of the playgrounds in each of your school yards was one of the earliest school projects of the Civil Works Administration to be completed entirely from federal funds.

In conclusion it is to be noted that reductions in expenditures have been made without reducing the educational opportunities of your children: at the same time the physical facilities in your schools have been improved. It has been a pleasure to work with you for the achievement of these ends.

Respectfully submitted,

GEORGE H. HARMON.

Superintendent.

February 10, 1934.
